

Sonic Innovations is a global provider of superior hearing solutions. We are passionate about quality, technology, and improving lives through enhanced hearing. We are dedicated to the growth and success of our hearing-healthcare partners.

varicom
variety is the sound of life

Sound comes from many sources: television, mobile and landline phones, MP3 players, PCs, and more—not to mention good old-fashioned conversations.

Adjusting for your every listening situation can be difficult—unless you have Varicom. Specifically designed for clear and easy access to external audio sources, Varicom boasts wireless connectivity as a standard feature. Varicom offers two technology levels and four distinct models. Combine those options with new Speech Variable Processing, and you'll feel connected to life.

the power to be connected

Varicom is no ordinary family of hearing instruments. It's where looks, lifestyle, and leading-edge technology come together. And you'll find there's hardly a situation for which Varicom isn't prepared.

diversity of options

The Varicom family includes four instrument styles, each with its own range of sizes and shapes. You'll find just the features, colors, and fitting options to suit your own preferences and needs.

Plus, Varicom accessories make your hearing device even more practical for a variety of settings:

SOUNDGATE connects your Varicom instrument to Bluetooth® devices like cell phones, music players, PCs and more. SoundGate also allows you to use the Varicom TV and Phone adapters.

TV ADAPTER enhances television sound so you don't miss a thing.

PHONE ADAPTER improves your ability to hear landline calls.

REMOTE CONTROL a device that lets you discreetly operate your hearing system.

speech variable processing

Varicom features a unique method of digital sound processing that amplifies the nuances of speech, making conversations clear and natural in a variety of listening situations.

device communications

An advanced automatic system allows Varicom to adapt seamlessly to every change in your sound environment. When one device senses a change, it automatically adjusts—and tells the instrument in your other ear to do the same. This instant communication results in a more natural listening experience.

Your hearing care professional can recommend the combination of Varicom features, styles and fitting options that are right for you. So tell them about the many sources of sound you want to connect with. And enjoy the variety in the sounds of your life.
